

IFU 02

Basics of Website Editing – Course Description

Course Objective:

The course aims to provide participants with the essential knowledge needed to navigate the world of website editing with confidence. They will learn the key concepts fundamental to this field and become familiar with WordPress, the most widely used website engine in the world. By the end of the course, participants will be able to use the content management system at a user level.

Course Content:

Participants will learn about the origins of the internet, the HTML hypertext markup language that forms the basis of websites, the structure and types of websites, content management systems, the IT tools required for website creation, and how to use the WordPress CMS system.
